

Multi-Format Readers as Gateways to Universal Access

Piotr Drost

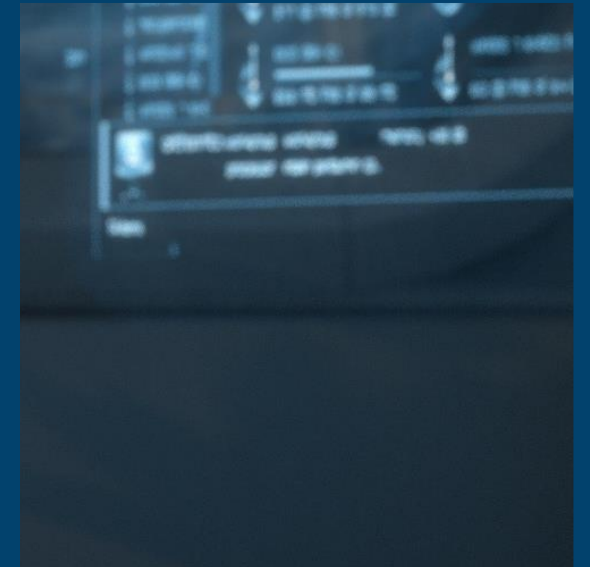

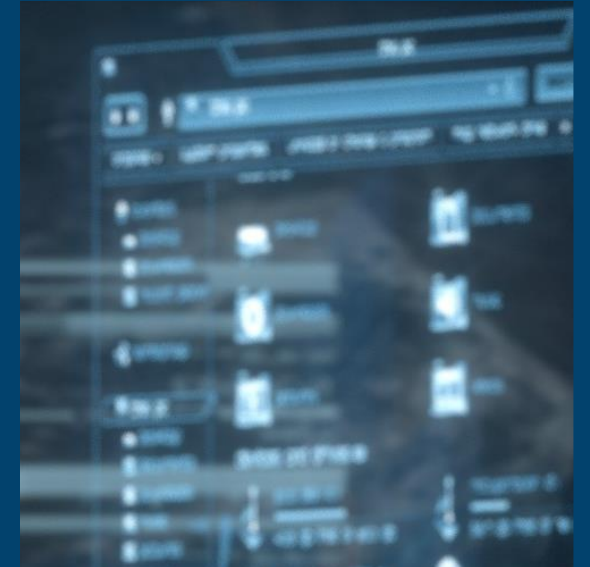

“ Our vision is to improve the safety of companies and people around the world ”

The main goal of RCS Engineering Sp. z o.o. is to provide innovative teletechnical solutions, including those strictly related to security. Knowledge of the market and the latest solutions allows us to offer integrated teletechnical systems to automate procedures, optimize investments while maintaining the highest level of security and high quality equipment.

R o b u s t C o n c e p t s f o r S e c u r i t y

Action Area

- Technical security systems combining perimeter protection and video systems
- Access control systems including the latest access card encryption methods
- Fire detection and fire alarm systems with integrated voice evacuation systems
- Unmanned aerial vehicles combined with technical security systems
- VMS and PSIM integration software

- Variety of access control systems
- Security in card technology
- Lack of autonomy
- Employee turnover and uncertainty

Solution – dual technology card
